

Survey Questions/Task Actions

Task: On the website, navigate to the Analysis page and read all the graphs.

Website: <https://cs6150-solar-grid-socioeconomic-impact.vercel.app/>

Survey Questions:

1. How easy was it to find the Analysis page from the homepage? (1-5, with 5 being very easy)
2. How easy is the data visualization to comprehend? (1-5, with 5 being very easy)
3. Are there ways in which you would improve the comprehensibility of the data presented?
4. How visually appealing are the graphs? (1-5, with 5 being very appealing)
5. Are there any aesthetic changes that you would make to the graph layout? (i.e. color choice, font, scale, etc.)
6. Does the data displayed seem properly represented?
7. Are there any ways in which you would like to see the data represented differently? (1-5, with 5 being properly represented)
8. Any notes on additional data correlations that you would like to see included?

Time to Complete

The completion of the survey and related tasks took 10 minutes for our partner and XX minutes for our mentor.

Analysis of Stakeholder's Experience with Tasks

Our partner found it simple to navigate to where the data analysis is housed on our website. In addition, they found our initial prototype to be comprehensible both visually and textually. They stated they would like to see the same analyses focused on the paired data because the study had more post-connection responses than pre-connection responses. This resulted in the results not being as clear when also accounting for new customers in the data.

Dates

Sent Proposed Tasks to Mentor: 10/3/2024

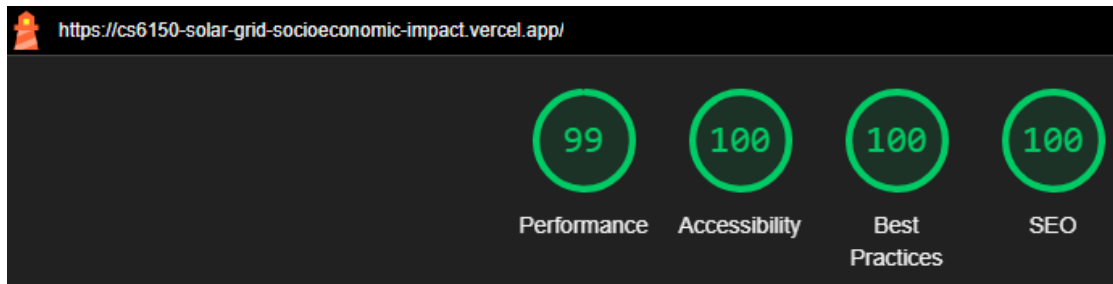

Received Feedback from Mentor:

Individual Member Contribution (Weekly Report)

Brock Pace

- Created survey and sent email with survey to mentor and partner
- Working on backend API

Xiaobo Ren

- Completed education subgroup analysis. Created related charts and text analysis.

Bokyoung Won

- Completed healthcare subgroup analysis. Created related charts and text analysis.

Sophia Wu

- Added and deployed data charts and text generated from Xiaobo and Bokyoung onto website

Challenges:

This assignment was a challenge due to our team not looking ahead regarding assignments. We did not look at the requirements for P5 until we had completed and turned in P4, leaving us with less than a week to create an initial prototype with our data analysis, create a survey to send to our mentor and partner organization, and to analyze the data from the completed surveys. This created a tight schedule for us.

Survey Results

1. Enter your full name:
Nicholas Selby
2. How long did it take to navigate to the Analysis page and read all of the graphs?
10 minutes

3. How easy was it to find the Analysis page from the homepage?
5 (Very Easy)
4. How easy is the data visualization to comprehend?
5 (Very Easy)
5. Are there ways in which you would improve the comprehensibility of the data presented?
No; good job and self-explanatory
6. How visually appealing are the graphs?
5 (Very Appealing)
7. Are there any aesthetic changes that you would make to the graph layout? (i.e. color choice, font, scale, etc.)
no
8. Does the data displayed seem properly represented?
5 (properly represented)
9. Are there any ways in which you would like to see the data represented differently?
I'd be curious to see the same analyses focused on the paired data. Because we had more post-connection responses than pre-, the results aren't as clear when the new customers are included.
10. Any notes on additional data correlations that you would like to see included?
No responses yet for this question.
