

Team Report 2
September 24th to September 30th
P4B - Solar Mini-Grid: Socioeconomic Impact Analysis

Dear Dr. Manning,

Since our previous report, we have

- completed the mini presentation, which is attached in this email
 - drafted dates for data analysis related milestones
 - defined a base architecture for our project
- started working on exploratory data analysis (EDA) for education and healthcare variables

Below are details regarding individual contribution since the prior team report:

Brock Pace

- Filled in architectures details related to the website back-end
- Began analysis of data for aggregation in back-end

Xiaobo Ren

- Drafted dates for data analysis related milestones
- Sub-meeting with Bokyoung to discuss the direction and progress of data analysis

Bokyoung Won

- Drafted and sent team report of team's current progress to mentor (9/23)
- Drafted dates for data analysis related milestones and architecture details
- Sub-meeting with Xiaobo to discuss the direction and progress of data analysis

Sophia Wu

- Splitting up work to complete the mini presentation
- Mini Presentation:
 - Filled in architectures details related to the website front-end
 - Captured and added screenshots of the project homepage and related Lighthouse metrics
